What's New?

Changes for version 6 :

1. Rebuilt with ,NET10
2. Fix a lots of bugs

My First Recipe

For users with no idea how to use this software, here's how to write your first recipe with Popotte.

- 1 - Click on New Recipe, in the toolbar. This will close the open file and prepare Popotte to write a new one.
- 2 - Click in the big white square (Text Field) to select it, then you can begin to write your recipe.
- 3 - When your recipe is finished or if you must take a break, it's important to save your recipe in a file not to lose it and to be able to find it later. To save it, click on the floppy disk in the toolbar or in File menu on Save.
- 4 - After clicking on the floppy disk, a dialog will open. As this is your first recipe, you will create your first Book too!
- 5 - In the first case, you enter the name of the recipe.
- 6 - In the next case "Book" you can enter the name of your new book or choose one in the list.
- 7 - If you want, you can also give a rating to your recipe.
- 8 - You can also enter a little description if necessary.
- 9 - Now that all the information about your recipe is written, click on the OK button.
- 10 - You can now access your recipe by clicking on the button "My CookBooks" in the toolbar (The Red Book)

Dialog My Cookbooks

This dialog is display when you click on the toolbar button "My CookBooks" or if you select "My CookBooks" from file menu.

This dialog is used to look at your books and recipes.

- Double click on a book to see if the recipes contain in this book.
- Right Click on a book to erase or change it's name.
- At the end of the list, if you enter a word and that you click on Search button, Popotte will display a list of all the recipes that contains the keyword entered.
- If you open a book double click on a recipe to load it in Popotte editor.
- You can also use the right click on recipe to modify its informations, Open the recipe with an external editor, add it to favorites, add it to menu or delete it.
- Click the favorites button to access your favorites recipes.
- Click the random button to select a random recipe.
- If you want to close the book, click on the back button.

Dialog Research Center

This dialog is displayed if you select Research Center in the Tools menu.

The Research Center dialog is used to add or delete search engines.

Added Search engines will be displayed in the context menu (When you do a right click) under Research Center.

To use it, select a word in the text, right click and select a search engine under Research Center.

To add an engine you must enter the site, ex: Wikipédia.

Then, you enter the search command, ex: `http://fr.wikipedia.org/wiki/Special:Search?search=;in;&fulltext=Rechercher`

Where ";in;" without quotes, replace the text to be searched.

Where do i find this command???

It's simple, here is how to add the Yahoo search engine.

Go to www.yahoo.com and do a search for "Popotte".

The Address displayed in the Navigator address bar, it's your command!

This should look like that:

```
https://search.yahoo.com/  
search;_ylc=X3oDMTFiN25laTRvBF9TAzIwMjM1MzgwNzUEaXRjAzEEc2VjA3NyY2hfcWE  
Ec2xrA3NyY2h3ZWI-?p=Popotte&fr=yfp-t&fp=1&toggle=1&cop=mss&ei=UTF-8
```

Now search for the word "Popotte" in this address and replace "Popotte" by ";in;" , without the quotes. Your command should look like this:

```
https://search.yahoo.com/  
search;_ylc=X3oDMTFiN25laTRvBF9TAzIwMjM1MzgwNzUEaXRjAzEEc2VjA3NyY2hfcWE  
Ec2xrA3NyY2h3ZWI-?p=;in;&fr=yfp-t&fp=1&toggle=1&cop=mss&ei=UTF-8
```
